An example of a chassis is a vehicle frame , the underpart of a motor vehicle , on which the body is mounted; if the running gear such as wheels and transmission, and sometimes even the driver's seat, are included, then the assembly is described as a rolling chassis. In the case of vehicles, the term rolling chassis means the frame plus the "running gear" like engine , transmission , drive shaft , differential and suspension. An underbody sometimes referred to as " coachwork " , which is usually not necessary for integrity of the structure, is built on the chassis to complete the vehicle. For commercial vehicles , a rolling chassis consists of an assembly of all the essential parts of a truck without the body to be ready for operation on the road. These include motor homes , fire engines , ambulances , box trucks , etc. An armoured fighting vehicle 's hull [6] serves as the chassis and comprises the bottom part of the AFV that includes the tracks , engine, driver's seat, and crew compartment. This describes the lower hull, although common usage might include the upper hull to mean the AFV without the turret. The hull serves as a basis for platforms on tanks , armoured personnel carriers , combat engineering vehicles , etc. In an electronic device such as a computer , the chassis consists of a frame or other internal supporting structure on which the circuit boards and other electronics are mounted. In some designs, such as older ENIAC sets, the chassis is mounted inside a heavy, rigid cabinet, while in other designs such as modern computer cases , lightweight covers or panels are attached to the chassis. In firearms, the chassis is a bedding frame on long guns such as rifles to replace the traditionally wooden stock , for the purpose of better accurizing the gun. The chassis is usually made from hard metallic material such as aluminium alloy and less frequently stainless steel or titanium alloy due to metals having superior stiffness and compressive strength compared with wood or synthetic polymer, which are commonly used in conventional rifle stocks. The chassis essentially functions as a more extensive pillar bedding, providing a metal-on-metal bearing surface that has reduced shifting potential under the stress of recoil. A barreled action bedded into a metal chassis would theoretically operate more consistently during repeated firing, resulting in better precision. With the increasing availability of CNC machining , chassis have become more affordable and sophisticated, and gained increasing popularity as it can also be expanded to accommodate customizable "furnitures" buttstock , pistol grip , etc. From Wikipedia, the free encyclopedia. Load-bearing framework of an artificial object, which structurally supports the object in its construction and function. For computer chassis, see Computer case. See also: Locomotive frame , Locomotive bed , Underframe , and Bogie. See also: Rolling chassis. See also: Rifle bedding. Molded design allows for driveshaft clearance to maximize storage space of 2. Adjustable frame clamps make for easy installation without drilling approx. Can be used as a battery box with optional Battery Hold Down Kit Box comes standard with built-in handle lock as well as space for secondary padlock. Features finger tabs on the cover and lid swings open degrees to give full access to box opening of What is our warranty? Lifetime Warranty on all polyethylene components from defects in materials and workmanship. What size is the In-Frame Tool Box? What is the weight? The total assembled weight is 26 lbs. Does the Tool Box require mounting brackets? Do the mounting brackets come with the Tool Box? However, there is an optional Battery Hold Down Kit Part Number: that can be purchased separately for customers use the box for battery storage. Does the truck frame need to be drilled to install? No, the frame does not need to be drilled for installation. How much weight can be stored in the Tool Box? The Tool Box is rated to hold up to lbs internally. Can you stand on the Tool Box? The cover of the Tool Box is foam filled and can hold up to lbs. Does the Tool Box handle have a keyhole? Yes, the box handle or what we call the Vector T latch, does have a keyhole, box includes keys, and it also contains eyelets for customers to place a padlock on it. Does the Tool Box have a lanyard? There are finger tabs on the cover for easy lifting. Is the Tool Box waterproof? This product is more waterproof than any other Tool Box on the market. Can you buy replacement parts? Yes, every part of the Tool Box can be purchased or sold separately, so in the event of an accident your customer can buy a replacement part. How do you hook up battery cables if you use the box for battery storage? Add holes in the rear wall of the box for battery cable entrance points. Use rubber grommets not supplied in the cable holes to protect the battery cables from wear. Do not drill through the cover of the box. Do you need any type of vent holes in box? Yes, vent holes are required when storing batteries in the truck box one near each battery. Currently custom logos are not available. Does the Tool Box have the black rubber side straps? No, there is no need for the black rubber side straps. Installation Instructions. Battery Hold-Down Kit. Part number: Browse more products. Check out other tested and tortured products by minimizer. Type the code from the image. We take delivery seriously Carrying, moving, transporting. When sufficient is not enough

How much would it cost to have it shipped in the mail with that size of box? We use FedEx, so what ever the delivery rate is for your area is would be the charge. Thank you. How do I find the store and cost. How do you get a box 48" x 70". I need the 68 inches. X 45" or do you put an extra large tv box and one of these together? Unfortunately, we have no box with the measurements you are looking for. However, here is a link to size what we do have if you are trying to get creative about putting boxes together. I hope this helps! I have a large dresser mirror 40"x40"x1. Do I need two such boxes? Hi Rodney, I would recommend looking at this box. Lg Flatpanel Box. How much does a mirror box weigh? Hello, Taylor! The large mirror box weighs 4 pounds on its own. Thank you! My picture is 48" x Hi, Dan! How would you recommend packing this item? Also, generally how many business days lately have been required for an order of several packing items to a Manhattan NYC delivery? Hi, Jan! Since we don't currently offer any boxes large enough for a mirror of that size, I recommend wrapping the mirror in several Furniture Pads and securing the furniture pads with Mover's Stretch Wrap. I would guess you will need at least 4 furniture pads to properly pad the mirror to protect it while in transit. We estimate business days for shipped delivery, but both of these products are available for purchase at all U-Haul Centers if you need them more urgently. I hope that is helpful! I have a painting that 48 x 30 x 1. Would this be big enough? Hello, Bre! Yes, our large mirror box will be perfect for your painting. Just wondering roughly how long these will take to arrive. Hi, Lauretta! Normally, we estimate business days in the U. If you need them more quickly, we recommend placing an online order to pick up the boxes from a nearby U-Haul center. Do you have any boxes that would fit? Hi, Kathleen! Is the cardboard double walled? Hello, Mary! This is a single-walled box. Have a 48" round glass table top that needs to be moved long distance. Which box is recommended and what packing materials do you recommend? Hello, Helen! We do not have any boxes large enough for a tabletop of that size, unfortunately. How many pictures can I fit in any one box? Hello, Chuck! The answer to your question will depend on the sizes of the pictures you are trying to fit in the box. You can fit as many pictures in the box as you can, but we recommend wrapping each picture in some sort of protective material such as Enviro-Bubble to keep the pictures from damaging each other. What are the dimension in cm? Hi, Luma! Here are the dimensions in centimeters: Thank you for asking! I have 2 pcs artwork. One is 40 x28 and the other one is 44 x Woukd the large mirror box work or do you suggest something else? Do I need to buy the picture picker kit or are the foam corners in this box ok? Hello, Roni! We recommend purchasing a box for each rather than putting both in 1 box. Keep in mind that this box only includes the box - no protective corners are included. Although not required, we highly recommend the Picture Packer Kit and Enviro-Bubble to protect your artwork while in the box. And can it be used to ship a painting in? Hi, Lawrence! Our large mirror box is just 1 box. You can purchase 2 of them and tape them together to make 1 larger box, but please keep in mind that they do not telescope or slide into one another. Would this box work? Hello, Donna! For a mirror of that size, we recommend our 4 Piece Mirror Box. Our large mirror box is not quite large enough. Thanks for asking! Any suggestions for a box for a 48 x 72 x 1. Unfortunately, we do not currently offer any boxes that could fit a painting that size. If you are moving the painting, you could wrap it in several Furniture Pads and secure them with Stretch Wrap. How do you put together the 2 boxes to fit a large piece of art? I hear a number of people struggle with that. Are there instructions anywhere? Keep in mind that these boxes don't necessarily "telescope" into each other, but can be interlocked in a sense so that they can be taped together to accommodate larger art or mirrors. Begin at the top end of the first box by folding the small flaps in, then fold one large flap on top of the other and tape. Move on to the second box and press along the dotted lines on the left and right sides until there is an indent or break in the cardboard. Without cutting the flap lock tabs on the bottom end of the first box, and by squeezing the second box sides so they indent, slide the second box into the open bottom end of the first box. Slide your item s into the box, then on the open end of the second box, fold the small flaps in, fold one large flap on top of the other and tape. Secure the middle portion where the second box telescopes into the first box with tape. I have 2 pictures that are 38 w X 32 L, will both of these frames fit into 1 box. Hi, Wanda! It depends on the thickness of the pictures. Would 2 of these be the best way to go? Also, would I need corner protectors? Hi, Frances! Yes, two of our large mirror boxes would be the best option for your painting. Corner protectors are optional, but for optimal protection, especially if your painting is fragile, we recommend either our Picture Packer Kit or our Foam Art Protection Corners. You can also opt to wrap the painting in Enviro-Bubble. Do you have a box to accommodate this? Hello, Lisa! I have 2 large framed painting to cover for a move. One is 52"x 72", the other is 47"x 56". What do I need to pack each one separately? Hi, Douglas! Unfortunately, we don't offer any framed picture boxes large enough for either. What we would recommend is wrapping each with Enviro-Bubble. Another option is to wrap each with Furniture

Pads and secure the pads in place with Mover's Plastic Wrap. Is this the largest box you have? Hello, Eric! I have a 39" round mirror - could I use two boxes and ship safely? Hi, Dorothy! If you are planning to ship the mirror, make sure to purchase some protective supplies such as Enviro-Bubble to make sure the mirror is properly padded in the box. Bonjour, Francine! Can this box be used for a round glass top? Hey, Cynthia! It's possible this box will work, but it really depends on the size of the round glass top table. For moving a glass top table, we recommend wrapping the glass piece in Furniture Pads and then using Mover's Stretch Wrap to secure the furniture pads on the glass. I have a painting that is 38 inches wide and 97 inches in length Unfortunately, we do not offer any boxes that can accommodate a painting of that size, even if you are using more than 1 box. If you are simply moving the painting, you can always opt to wrap the painting in Enviro-Bubble to protect the painting while in transit. Would 2 of these together work? Hi, Heather! Can this box accommodate a 31 x 47 framed painting. With appropriate padding and your picture packer kit? Hi, Alec! You can use this box to ship but we highly recommend ensuring the picture is properly padded with something such as Enviro-Bubble and the Picture Packer Kit. Hi, LaDara! You would need to use two of the large mirror and picture boxes to accommodate a canvas painting of that size. Can I put a 48 inch flat screen tv in it if so does it have corner protectors? Hello, Rochelle! We do not recommend using our large mirror and picture box for a flat screen TV. I have a painting that is 48" x 48" x 2". Can I use 2 of these boxes to move this item? Hello, Andy! Yes, 2 of our large mirror boxes can be used together to accommodate a painting of that size. Hello, Karen! We do not recommend using our large mirror box for a TV. I need 2 boxes. One being 49 height by 25 wide, 2nd being 49"lengh, 45 height by 10"wide. What boxes could i buy and put together to make this happen. Hi, Janice! As for the 2nd box you mentioned, unfortunately, we do not have any boxes that are close enough to those measurements. Do you have a box to ship crib pieces? Hi, Bobbie! We do not have any boxes that are large enough to accommodate crib pieces measuring 75" x 45" x 12". It sounds like you may need to break up the pieces into smaller shipments. I need a box to fit 30x30x What do u recommend. Do you have a box approx. Hi, Marcia! I have a Acrylic Canvas that needs to be shipped. The dimensions of the art is: 44 in x 32 in x 5 in. Is the large mirror box appropriate? Hey, Celeste! The only option we have that will absolutely work is our Picture Shipper. How much does the box weigh? Hi, Jenny! Good morning, I have 6 wooden doors that go to a dvd cabinet that have glass panes in them. Also since they are thin can I put at least three in 1 box? Yes, you could telescope together two of our large mirror boxes to accommodate your 6 wooden doors. Since the doors have glass panes, we strongly recommend wrapping each door in a protective material such as Enviro-Bubble or Cushion Foam. I have a large plexi-glass measuring 48" w x 94"L, what can I use? Hi, Barry! We do not currently have a box that can accommodate a piece of glass of that size. How much for shipping to This box with 7 pounds for weight. Hi, Angie! To see what it would cost to have a large mirror box shipped to you, please add a large mirror box to your cart, begin the checkout process, and enter your address as the shipping address. You will be given the shipping costs at that point. If you are asking what it would cost for you to ship this box in the mail, you would need to contact the mail carrier of your choice. How much are these boxes. This price applies if you purchase the box to be shipped to your home or to be picked up from a U-Haul center. Hey, Danny! The edge crush test rating of this box is Will this fit in two extra large mirror boxes telescoped together? Hello, Nurul! Yes, you can absolutely purchase two large mirror boxes and telescope them together to ship your table. Can the box fit multiple pictures frames? Approximately how many? Hey, Kelly! The answer to your question depends entirely on the dimensions of the frames you are attempting to fit into the box. We recommend stacking or arranging the frames the way you would want them to go into the box we recommend wrapping each frame in Enviro-Bubble. Also, be sure you do not place more than the box's capacity of 65 pounds inside of the box. How much does this box weigh? Can i use a mirror box to hold 2 glass long oval shelvings from a tv stand if packed with bubble plastic? Hey, Yolanda! This depends on the sizes of the shelvings. We recommend wrapping the shelvings with Enviro-Bubble or Cushion Foam for protection. I need box for mirrored. I have 10 mirrors 36 inches long and 10 inches wide. Hi, Mary! We also recommend using a Picture Packer Kit in each box with each mirror to ensure the mirrors are protected from damage.In addition to the Picture Packer Kit, we recommend filling any extra, empty space in the box with a packing supply such as Biodegradable Packing Peanuts or Packing Paper. I hope that is all helpful! What is the largest size picture boxes do you have? Hi, Regina! Unfortunately, we do not carry a box large enough to accommodate a picture of that size. We need to ship a painting that is 48" long by 42" high by 4" thick. Will we be able to use two large mirror boxes? Hi, LJ! Yes, you can put two together and use them for your painting. What is the largest glass box you have. I have a table top that measures 46x 80 long and 2 in. if you are moving then we'd

recommend using furniture pads or quilted pads to protect the table top in transit. However, if you are shipping it somewhere then you will need to purchase a custom box for it. Do the flaps on long edge of these overlap or do they meet in the middle? Hi, Alice! The flaps on this box overlap. What is the weight of the box? IO would like to estimate my shipping cost. The Large Mirror Box weights 3. What is the weight of the box alone? Can I ship this box through Fed Ex? I have a heavy dresser mirror if I use bubble wrap to protect it would that be enough and is there a box to accommodate? Without knowing the wight of the mirror it is difficult to say. If it is over 65 lbs, you would want to use a double walled box. We recommend using furniture pads as well. Yes, that will work. The boxes are made to allow for telescoping one into the other. The flap lock tabs are in place for using 2 of them together. If you are only using one, yes, you will need to cut the flap lock tabs. I was wondering if you had TV boxs for a 40 in flat screen and a 60 in flat screen. And how much those would cost. Lee, we absolutely do! Without knowing the depth of your TV, we cannot tell whether or not it will fit. How do I fold this box. Flip the box over, place your item in the box and fold the top small flaps in, then fold one large flap on top of the other and tape. What is the weight limit or large mirror box? Instructions on the mirror box are confusing. Can you clarify? To make sure we get you the information you need, can you please call us at 1. Are the measurements given the exterior size? Looking for boxes in which to move 30x48 in. Is this one, or another one you offer, appropriate? They are inside dimensions. This box should work based on your requirements. Can this be used for international shipping? It's been done, but I tend to want to be a bit more careful and use only double wall boxes for international shipments. This would work, but make sure that if you do, you're generous with the packing material. Is the large mirror box heavy duty enough to pack a flat panel plasma tv? Probably in the 70 pound range. We do not recommend packing a flat screen TV in a mirror box. For maximum protection, use part FSTV. Is the large mirror box big enough to put more the one picture in? That would depend on the width of the pictures. The width of the box is 4 inches. I would like to know if the large mirror boxes are equipped to send pictures in the mail. If the box is properly packed, there should be no issue sending this via mail. We highly recommend using the Picture Packer Kit with this box and insuring the package for the full value of its contents. You can use the U-Haul location finder or you can visit the Box Exchange to view posts from others with available supplies in your area. Yes, these prices are consistent with U-Haul owned locations.
